SOFTWARE

Amelia II: A Program for Missing Data (with James Honaker and Gary King).

Amelia is an R library for the handling of incomplete multivariate data with an easy-to-use graphical user interface. <http://gking.harvard.edu/amelia/>

CEM: Coarsened Exact Matching (with Stefano Iacus, Gary King, Guiseppe Porro.)

CEM is a Stata library for matching to reduce bias in the estimation of causal effects. <http://gking.harvard.edu/cem/>

causalsens

causalsens is an R package to implement the selection bias approach to sensitivity analysis for causal effects.

<http://www.mattblackwell.org/software/causalsens/>

DirectEffects

An R package to estimate the controlled direct effect with a suite of different approaches, including those described in our 2016 APSR article.
