Using Cousteau

Cousteau is a Beamer theme based on a nautical minimalism. Some parts of the theme are inspired by or adapted from the Metropolis theme. You can enable Cousteau by using the following commands:

```
\documentclass{beamer}  
\usetheme{cousteau}
```

The theme assumes you have the typefaces **Fira Sans**, **Fira Mono**, and **GFS Neohellenic Math** installed. XeTeX is required to compile a slide deck with Cousteau.

Highlighting words

There are several ways to highlight text. One way is to `\emph{emphasize}` what you would like to say or to use one of `\alert{several}` `\alertb{accent}` `\alertc{colors}`. Another good option is `\textbf{bold-face}` type.

There are several ways to highlight text. One way is to *emphasize* what you would like to say or to use one of **several** **accent** **colors**. Another good option is **bold-face** type.

- Regular
- *Italic*
- SMALL CAPS
- **Bold**
- ***Bold Italic***
- **BOLD SMALL CAPS**
- Monospace
- Monospace *Italic*
- Monospace **Bold**
- Monospace **Bold *Italic***

Unordered list:

- RV Calypso
- SP-350 Denise
- Alcyone

Numbered list:

1. Un
2. Deux
3. Trois

Block content.

Example block

Block content.

$$f(x) = \frac{1}{2\pi} \exp\left(-\frac{1}{2}x^2\right)$$

Four score and seven years ago our fathers brought forth on this continent, a new nation, conceived in Liberty, and dedicated to the proposition that all men are created equal.

Image frames

Sometimes it can be useful to have an image take up the entire frame. Using `tikz`, Cousteau provides a an easy command to include a full screen image for a slide:

```
\imageframe{kanagawa.jpg}
```

See the next slide for the result of this command. `imageframe` will make the image as large as possible without cropping, so there may be some vertical or horizontal space. Crop images to 4:3 for best results.
